

XIAOHAI67890

Web3 Developer Experience / DevRel / Full-Stack Engineer | Ethereum Protocol Researcher
Guangdong, China | zc040809@gmail.com | GitHub: github.com/XiaoHai67890 | X: x.com/XiaoHai67890 | Paragraph: paragraph.com/xiaohai.eth

SUMMARY

Web3 full-stack developer and developer-ecosystem builder focused on Ethereum protocol, infrastructure, ZK / account abstraction applications, and technical education. Currently serving as the 2026 EPF Chinese-speaking Regional Lead. Combines hands-on product engineering with protocol research, DevRel, community operations, and cross-cultural developer growth.

CORE SKILLS

Protocol & Smart Contracts: Solidity, Ethers.js, Wagmi, Viem, Hardhat / Foundry, ZK Proofs, Semaphore V4, Account Abstraction, EIP research, Substrate
Frontend & Engineering: React 18, Next.js 15, TypeScript, TailwindCSS, Zustand, React Query, Canvas rendering, WebSocket, Framer Motion, Node.js, Go, Git
DevRel & Ecosystem: developer education, technical writing, community operations, events, content strategy, technical storytelling, cross-cultural collaboration

EXPERIENCE & COMMUNITY

Ethereum Protocol Fellowship (EPF) | 2026 Chinese-speaking Regional Lead

Jan 2026 - Present

- Lead Chinese-speaking developer participation for EPF, covering outreach, learning support, resource coordination, and community collaboration.
- Organize research and learning around Ethereum protocol, consensus mechanisms, and core EIPs, helping developers move toward protocol contribution.
- Independently built and maintain ETHCorePlay, a structured Ethereum protocol learning platform and practice entry point for Chinese-speaking developers.

ETHPanda | DevRel / Developer Relations & Community Ecosystem Operations

Nov 2025 - Apr 2026

- Supported the end-to-end operation of the ETHPanda Web3 internship program; community distribution, content packaging, and employer branding helped attract 2,900+ global applicants.
- Translated protocol, OpenAC, EIP, and governance topics into accessible developer-facing content and education materials.
- Supported Chinese-speaking developer ecosystem coordination, offline events, and cross-community collaboration; invited ETHShanghai speaker on decentralized networks, governance, and Layer 2 topics.

LXDAO | Core Contributor / Technical Governance Researcher

Jul 2025 - Feb 2026

- Contributed to LXDAO technical ecosystem and governance research; proposed and authored the "Exit-Driven Evolution Theory".
- The governance research reached 4,000+ reads and demonstrated mechanism-design thinking, DAO coordination insight, and industry narrative ability.

Aro.Network (DePIN + AI Edge Cloud) | Frontend Developer

Mar 2025 - Sep 2025

- Built core interactions for the ARO Lite browser extension and Web Dashboard, improving rendering performance and node-operator user experience.
- Developed real-time node data dashboards with Web3 wallet integration for network status visualization, node rewards tracking, and on-chain interaction flows.

Crust.Network | Smart Contract Developer

Sep 2024 - Dec 2024

- Contributed to smart contracts for the decentralized storage incentive layer, supporting MPoW, GPoS, and on-chain payment verification logic.
- Optimized \$CRU payment and verification flows for DApp serverless hosting and NFT off-chain storage scenarios, coordinating with TEE-based storage-state validation.

SELECTED PROJECTS

K-Line Predict / KMarket Prediction Market | High-Performance Trading UI & AA Wallet UX

Jan 2026 - Present | SPARK AI Hackathon Champion

- Built a 2D grid trading interface with Next.js 15 and Canvas rendering, supporting massive real-time price points and high-frequency state updates.
- Implemented a bidirectional WebSocket data link for millisecond-level market pushes and consistent frontend-backend state synchronization.
- Designed an AA proxy-wallet auto-binding mechanism with offline signature authorization and gas-less trading UX.

CrediNet | Decentralized Credit Protocol | Full-Stack / Frontend Architecture

Oct 2025 - Dec 2025

- Owned the PC-side frontend architecture using React 18, Vite, TypeScript, TailwindCSS, and Framer Motion.

- Integrated RainbowKit, Wagmi 2.x, and Viem; encapsulated wallet login, data authorization, and dynamic SBT minting hooks.
- Built a five-dimensional credit radar chart with Recharts, Zustand, and React Query; invited to ETHShanghai to deliver a talk on decentralized credit networks.

ETHCorePlay | Ethereum Protocol Learning Platform / AI-native Workspace

Mar 2026 - Present | github.com/XiaoHai67890/ETHCorePlay

- Designed an iterative learning workspace for EPF and Ethereum protocol onboarding, organizing identity, memory, tools, user context, and heartbeat/task modules.
- Integrated local Claude Code setup scripts and documentation to provide a unified entry point for protocol learning, coding practice, and AI-assisted research.

DeFund Protocol | Decentralized Yield Protocol / Aave V3 + Risk Pool

Nov 2025 - Feb 2026

- Contributed to the DeFund MVP architecture and frontend implementation using React 18, TypeScript, Vite, TailwindCSS, RainbowKit, Wagmi, Viem, Zustand, and TanStack Query.
- Designed the protocol architecture around ERC-4626 vaults, Aave V3 yield strategies, 70/30 yield distribution, RiskPool, ProjectRegistry, Safe / Snapshot governance, and The Graph indexing.

ZK-Confidential Voting | ZK Privacy Voting Protocol

Nov 2025 - Jan 2026

- Integrated Semaphore V4 across identity commitments, ZK proof generation, and nullifier-based double-vote prevention.
- Built an on-chain transaction state machine and optimized ZK verification costs through off-chain precomputation and Poseidon hashing.

OPEN SOURCE, TEACHING & IMPACT

- Created and maintain 021 Ethereum, an open-source Ethereum education project with 100+ / 140+ GitHub stars.
- Delivered and published the ETHPanda "Web3 Internship Program (Winter): Dapp Workshop" teaching video (~90 minutes): bilibili.com/video/BV1YRBZBLET5.
- Write on Blockchain Civilization Trilogy, OpenAC, EIPs, and DAO governance, converting complex technical topics into reusable community knowledge assets.
- Languages: Chinese native; English fluent / working proficiency.
